

CONTENTS

Preface -----	1
S. Mizutani	
(1) Proceedings of Symposium on Tandetron Accelerator Mass Spectrometer, Nagoya University "New Developments in Studies on Archeology and Cultural Assets by Using ¹⁴ C Dates Measured with Tandetron Accelerator Mass Spectrometer"	
1. An Introduction to the Symposium -----	5
T. Nakamura	
2. Status Report of ¹⁴ C Measurements with Tandetron Accelerator Mass Spectrometer at Nagoya University in the Year of 1993 -----	9
T. Nakamura, A. Ikeda and T. Ohta	
3. Paleomagnetic Dating for the Objects of Archaeology and Anthropology-----	24
H. Sakai	
4. 地震と考古学-----	30
寒川 旭	
5. Recent Surface Faulting on the North Anatolian Fault East of -----	32
Erzincan Basin, Turkey - a Trenching Survey	
K. Okumura, T. Yoshioka, I. Kuscu, T. Nakamura and Y. Suzuki	
6. Did Horses Inhabit Japan in the Jomon Period ? -----	49
M. Kondo, S. Matsu'ura, T. Nakamura, N. Nakai and A. Matsui	
7. 古代鉄器の ¹⁴ C年代測定 -----	54
井垣謙三	
8. Paleoenvironmental Transition of the Pre-historical and Historical ----	59
Ages Based on the Fossil Insects Assemblages	
Y. Mori	
9. 九州地方の縄紋中期土器編年と ¹⁴ C年代 -----	75
高瀬哲郎・徳永貞紹	

10. In Kanto Area, Japanese Paleolithic Chronology and a Reconstruction of Site's Environment Turn to a New Direction - in Kanto and Chubu, the Adaptations of Japanese Paleolithic Chronology and the Sites in Their Paleoenvironmental Context - T. Karube	81
11. Morokuwa-no-furubune ----- (The Old Rowing Boat of Morokuwa) Y. Ishida	98
12. Long-term Prediction of Volcanic Eruptions Based on the Data ----- from Records and Volcani-stratigraphical Investigations I. Moriya	121
13. Cultural Exchange between Hokkaidou and Far Eastern of Russia ----- G. Yamada	134
14. Name Lists of Participants -----	145
 (2) Summaries of Researches Using AMS	
1. Late Holocene Development of Peat Layers in Coastal Alluvial ----- Deposits in the North of Hokkaido, Japan A. Ohira and M. Umitsu	146
2. Origin and Transport of Particulate Organic Matter ----- in Deep Water Column of Ocean T. Nakatsuka and N. Handa	154
3. Hydrocarbons Record of Marine Sediment in Lutzow-Holm Bay, ----- Antarctica N. Harada, N. Handa and M. Fukuchi	161
4. Origin and Behavior of Atmospheric Methane Inferred from ----- Carbon Isotopic Analyses (II) J. Moriizumi, K. Nagamine, T. Iida, Y. Ikebe and N. Yoshida	170
5. A Method of C Extraction from Iron and Steel Samples for ¹⁴ C Dating --- T. Ohta, M. Hirasawa and T. Nakamura	178

6. Desert is a Potential Sink of CO ₂ : Isotopic Evidence -----	184
E. Inayama, Y. Asahara and T. Tanaka	
7. Radiometric Dating of Submerged Corals off Southern Queensland, -----	189
Australia	
K. Sasaki, A. Omura, T. Nakamura, Y. Tsuji, H. Matsuda,	
N. Honda, Peter J. Davies and John F. Marshall	
8. Radiocarbon Ages of Permafrost in the Bykovsky Peninsula -----	197
and Kalakhari Island, Eastern Siberia	
D. Nagaoka, T. Sone, T. Nakamura, M. Fukuda, T. Nakayama	
and V. Kunitsky	
9. Eruption-frequency during the Last 6,000 Years of Nasu-Chausu, -----	207
Takahara and Nikko-Shirane Volcanoes, Central Japan	
M. Okuno, I. Moriya and T. Nakamura	
10. High Resolution Dating of an Eruption Event by Using Tree Rings -----	217
of Fossil Wood - A Case Study on the 1783-eruption, Asama Volcano -	
H. Kumagai, H. Oda and T. Nakamura	
11. Correction of Carbon Isotopic Fractionation for ¹⁴ C Measurements ----	237
with Tandetron AMS - a Guide for Calculation of ¹⁴ C Dates	
T. Nakamura, A. Ikeda, and T. Oda	
12. A Study of Correction for Carbon Isotopic Fractionation -----	244
in ¹⁴ C/ ¹³ C Ratio Measurement with AMS	
H. Oda	
13. Present and Future of Ultra-sensitive Radiocarbon Dating -----	252
with Accelerator Mass Spectrometry	
T. Nakamura	
(3)Lists of Theses for Graduation, Prepared by Using ¹⁴ C Dates -----	268
with the Tandetron Accelerator Mass Spectrometer, Nagoya University
