

CONTENTS

Preface -----	1
S. Mizutani	
(1) Summaries of Researches Using AMS	
1. Paleoenvironmental Changes of Small Alluvial Lowlands by the Lake Furen, --- 4 Hokkaido, during the middle and late Holocene	
A. Ohira, M. Umitsu and S. Hamade	
2. Sea Levels in Late Holocene Deduced from Deposit in Small Lowland in ----- 11 Southern Shikoku, Japan.	
S. Hamade	
3. 中国雲南省ディエンチ湖畔の貝塚の年代----- 16	
吉良竜夫	
4. Estimation of Paleoseismicity and Seismic Potential of the Active Fault --- 19 Along the Eastern Boundary of the Shonai Plain, Northeast Japan.	
Y. Suzuki, M. Hori, and M. Matsuo	
5. Radiocarbon Ages of Woods and Buried Soil Layers and Their Significance --- 27 in the Potechu Valley, Southeastern Tibet	
S. Iwata, Y. Ageta and T. Ohata	
6. Radiocarbon Dating by Accelerator Mass Spectrometry of Bone Remains of ---- 36 Palaeoanthropological and Archaeological Significances	
S. Matsu'ura, M. Kondo, T. Nakamura and N. Nakai	
7. Age Measurement of the Marine Calcareous Sediment ----- 45 -Study on Amino Acid Racemization Dating -	
N. Harada and N. Handa	
8. Studies on Horizontal Transprot of Organic Materials in the Continental --- 53 Shelf-trench System	
N. Handa, T. Sugimoto, M. Itoh and T. Saino	

9. Radiocarbon Dating of Cored Sediments from Oonohara and Naganoyama -----	61
Moorlands at Tsukude-mura, Shitara-gun, Aichi Prefecture	
T. Nakamura, A. Ikeda, T. Ohta, and	
A Research Group of Oonohara Moorland	
10. Comparison of Radiocarbon Ages for Elemental Carbon Prepared by -----	73
Two Decomposition Methods of Calcium Carbonate Samples	
A. Ikeda and T. Ohta	
11. Origin and Behavior of Atmospheric Methane Inferred from -----	77
Carbon Isotopic Analyses(I)	
- Preparation of Air Sample for Carbon Isotopic Analyses-	
J. Moriizumi, K. Nagamine, T. Iida, Y. Ikebe and N. Nakai	
(2) The Last Lecture at the Retirement from Nagoya University	
1. A Big Impact on Radiocarbon Dating by the Development of -----	85
Accelerator Mass Spectrometry	
N. Nakai	
(3) Proceedings of Symposium on Tandetron Accelerator	
Mass Spectrometer, Nagoya University	
"New Developments in Geological and Geographical Studies by Using ^{14}C	
Dates with the Tandetron Accelerator Mass Spectrometer"	
1. Introduction to the Sympisium -----	107
T. Nakamura	
2. Status of ^{14}C Measurements with a Tandetorn Accelerator Mass -----	110
Spectrometer at Nagoya University in the year 1992	
T. Nakamura, A. Ikeda, and T. Ohta	
3. Present Status of ^{14}C Dating for Late Pleistocene Volcanic Products -----	127
Using a Tandetron Accelerator Mass Spectrometer of Nagoya University	
T. Sakamoto and T. Nakamura	

4. Special Issue on the Problems of the Late Pleistocene Chronology -----	135
Estimated from Tephrochronology in Central Japan	
H. Takemoto	
5. 加速器 ¹⁴ C年代測定による野尻湖層の編年 -----	164
- 野尻湖における火山灰層序及び人類考古の研究に関連して	
沢田 健・公文富士夫・秋山雅彦・中村俊夫・中井信之	
有田陽子・野尻湖人類考古グループ	
6. The Reconstruction of the Paleoclimate in Northern Japan -----	177
since the Last interglacial	
S. Katoh	
7. 第四紀研究において加速器 ¹⁴ C年代測定に期待されること -----	192
藤井昭二	
8. Paleoenvironmental Analysis of the Late Holocene Based on -----	200
the Fossil Insects	
Y. Mori	
9. AMS ¹⁴ C Ages and Possibility of Paleoenvironmental Studies by -----	209
¹³ C/ ¹² C Measurements of Collagen and ¹⁸ O/ ¹⁶ O of Phosphate in	
Fossil Mammal Bones and Teeth	
N. Nakai, N. Yoshida, I. Mori, T. Nakamura and H. Kaneda	
10. Name lists of Participants -----	223
(4) Lists of Theses for Graduation, Prepared by Using ¹⁴ C Dates -----	224
with the Tandetron Accelerator Mass Spectrometer, Nagoya University
